Home Canning

An excensive pressying study has been carried on over a period of months to determine the best proportions of sugar and corn syrup to use in home canning. The study indicates that, with the addition of corn syrup to sugar, home-canned fruit will score high in texture, flavor, color and general appearance. Some of the fruits tested were four fine peaches, apples, plums, blackberries and pears. The work began when a staff of home economists and a food chemist began to pack jars of fruits in specially equipped home kitchens in Westfield, N. J., using various proportions of sugar, and sugar and corn syrup.

Farmers Plan Greater Buys in War Bonds

In spite of an "off" season so far as income is concerned, farm War Bond leaders are now making preparations for selling more bonds to farmers during the Seventh War Loan than in any previous Drive, according to M. L. Predmore, Chief of the Agricultural Section, War Finance Division, Treasury Department. With the help of country bankers they're out to convince the men who till the soil that they should convert their expanded bank accounts into bonds.

"Farmers, like all Americans, have been building up bank deposits and currency holdings ever since the war started," Predmore said. "On January 1, 1920, agriculture held currency and bank deposits totaling slightly over 4 billion dollars. The 1945 figure is not available, but it is expected to be in excess of 19 billion.

"With larger operations and increased costs farmers must have more operating capital than in 1940, but they don't need 19 billion, in Predmore's opinion. He believes farmers can and will put a substantial portion of these cash reserves into War Bonds.

When they go out to sell War Bonds to farmers in the Seventh, War Finance Committees throughout the nation will stress personal solicitation. A survey made following the Sixth War Loan showed that 57 percent of the farmers who were personally solicited bought bonds.

True or False

Test your knowledge of your Government's War Bond Financing program. The answers to these questions, given at the end, should be known by every American. How good are you?

1. 85 million Americans have purchased Series E War Bonds.
2. 24% of all the money ever invested in E Bonds is still invested in them.
3. If a Bond is lost, stolen or destroyed, it is just the same as if the owner had lost the money he invested.
4. E Bonds may be cashed at any qualified bank for their full cost any time after 60 days from date of issue.
5. The U. S. Government's promise to redeem War Bonds any time after 60 days from date of issue is just as strong as its promise to stand back of a dollar bill.
6. You have to hold a Bond the full ten years to get any interest.
7. The lowest-priced War Bond costs $25.
8. War Bonds are better than cash.
9. Two persons cannot own a War Bond jointly.
10. The only reason we should buy War Bonds is to help pay for food, ammunition, etc., for the armed forces.

ANSWERS

2. True.
3. False. War Bonds are registered in the names of their owners, and lost Bonds can be replaced.
4. True.
5. True. Compare wording on a Bond and a bill.
6. False. Your Bond increases in value after one year. See the values on the back of the Bond. But you get a greater increase in value the longer you hold a Bond, up to $1 at the end of 10 years for every $3 you paid.
7. False. A $25 Bond costs $18.75.
8. True. They can be replaced if lost, they increase in value and they can be converted into cash in case of need.
9. False. War Bonds can be owned by two people as co-owners or as owner and beneficiary.
10. False. Your savings invested in War Bonds will also help to stabilize prices now and to provide for your own security in the future.
